VOL. 16 NO. 1

THE ALL-FLORIDA RADIO AMATEUR'S PUBLICATION

JUNE / 1972

Price 20c

WD4USA-WR4USA 1972

The Dade County Amateur Public Service Corps. (W4EH-W) of Miami will sponsor a Special Events station during the National Democratic and Republican conventions in Miami Beach during July and August. The Corps has already received FCC approval for WD4USA (Democrats) and WR4USA (Republicans).

Two complete amateur radio stations will be set up for public display, interviews and sending of free radiograms to the folks back home. The stations will be manned from 10 a.m. to 10 p.m. for both four-day convention periods. One station (SSB-CW) will be on The Lincoln Road Mall and the other (2 meter FM) at the Convention site.

Any licensed amateur in the Dade-Broward-Monroe county area who would like to participate in this event may do so by calling George Nehiley, WB4ONR, Corps. Secretary at 305-625-0188 for details. We are looking mostly for traffic handlers and those interested in public service. More details next month.

JACKSONVILLE REPEATER

The Jacksonville repeater is now in full operation. Sponsored by the Jacksonville Range Assoc., the Greater Jacksonville Repeater, WB4QFL, operated on 146.16 (Cor Autopatch) and 146.34 access TT7-1 autopatch and output frequency 146.76. Deviation: 5 kHz, elevation 400 feet with 60 watts. Log requirement: Give time and call. Info submitted by Howard Kelley, K4DSN, Jacksonville. (Congratulations and good luck to WB4QFL, Editor)

MORE ON LICENSE TAGS

Last month SKIP reported the CBers won their Auto Tag License Bill. This is true. But what is not true is that we amateurs will not have to pay \$5.00 extra for our new plates. The CBers do, but we still pay only \$1.00. I say again, only one buck! Due to a mix-up in telephone conversation with our Man in Tallahassee, WB4GTU, we gave you the wrong dope. This is another reason we like to have everything in writing and sent to our Box 501. So we won't make boo boos. Thanks again to Jim, WB4GTU for keeping us informed. So now W4IYT can have his 1973 tag on his 1954 Chevy. Geece.

1972 FLORIDA QSO PARTY RESULTS

The 1972 Florida QSO Party has come and gone. Here are a few of the "stock market" statistics for this year as compared to last year's party:

Total entries	down 9 percent
Fla. CW entries	up 50 percent
Fla. Phone entries	up 20 percent
Out-of-state CW	down 21 percent
Out-of-state Phone	down 31 percent
Novice activity	up 200 percent (hi)

In years past we've tried special categories such as Florida Portable and Florida multi-op, but this year we hit

upon a keeper — a Florida Club Aggregate category. Over 44 percent of all Florida activity was to be considered for Club Aggregate scoring. This year the Trophy goes to the Dade County ARPSC, W4EHW, in Miami for a total of 83,492 points.

In other Florida awards — high Florida CW entry and Trophy winner is Jim Frison, K4JWM, Miami Springs, while the Phone Trophy goes to Bill Walker, WB4EYK, Jacksonville.

In the out-of-state category — high CW goes to K4LDR, Peter Shaw of Virginia, and high Phone goes to WA6PGB, Steven Bueg of California.

Certificates were awarded to the high scoring station in each county, state, province or country in each mode. (96 in all.) (See score page elsewhere.)

If you have any suggestions that can be applied to next year's party, send them along, as plans are already being made. 73 and CU next year.

Charlie Trice, WA4RRB
Florida QSO Chairman
(For results, see page 16)

HERE IS THE VERY FIRST AMATEUR auto tag license issued in Florida. It went to W4IMJ, Senator Floyd Fargo Boyle of Sanford, sponsor of the Florida Amateur Radio Auto Tag Bill in 1950 — over 22 years ago. W4HGO "High Grade Operator" shown on the left is now a Silent Key. Senator Boyle sports his tag on his "New Car." Amateur tags are still only one dollar extra, not five as reported in last month's editorial. (Photo via K4OER.)

RTTY BROADCASTS — NEW SPEED

Many of our SKIP readers have radio-teletype. A call to Mr. Morris E. White, Chief of the Miami Flight Service Station, on CARMET broadcasts revealed the following: On or about July 1st WBR-70 will transmit CARMET and hurricane advisories on 5925, 8130, 10950, and 14395 Khz around the clock. 3235 Khz from 2030 to 1400 GMT. 16440 Khz 1155 to 0500 GMT. A standard 5 level code will be used at the new 100 wpm speed. 60 wpm will be discontinued on this date. Mr.

White informed SKIP that some 400 to 500 South American stations copy the CARMET weather broadcasts and so do hundreds of ships around the world. At a much later date WBR-70 will shift to a 8 level code. All WBR-70 transmitters are high power and located about 12 miles west of Miami in the Everglades. —A.C.

**Letters To Editor**

Editor:

Thought you might want some news from Army MARS. Wife and I are visiting my brother here at Kailua, Oahu, Hawaii. We are seeing the sights, Army MARS station AB8USA and the local Air Force station. Army was on 4025 standing by for astronauts and AF was working Vietnam, Japan, Korea, Homestead and Louisiana, like locals on 27.8 mHz. Plenty of traffic thru here.

73,

Pat Murphy, K4AO, AA4AO

Editor:

My father always enjoyed Florida Skip very much so I am taking this opportunity to inform you that he has passed away on March 17, 1972. His call letters, K4EK, went on the air in 1959 and to all his ham friends he was known as "Grandpappy" on 20 meters single side band 14330 k. His interest in Amateur Radio began

many years ago in April 1916 in the United States Army where he served in the First Tactical Aviation Unit in the Mexican Border Expedition. In 1925 he obtained the call W2FR, Lakehurst, New Jersey. Later calls were W7EVF, Kalispell, Montana and W8FV, Dayton, Ohio. Earle O'Connell made the last entry in his logbook as W8FV-6 in Huntington Beach, Calif.

His daughter,

Maureen M. Schoepke
Pasadena, California 91107

Editor:

Florida SKIP came today and as usual I enjoyed it from "kiver-to-kiver."

I wanted to let you know that I support your editorial wholeheartedly. My "road menace" will never again sport Florida license plates with my Ham call. Since I have used these plates since my arrival in Florida in 1955, I regret the situation but I

(Continued on page 14)

**GUEST EDITORIAL
OUR IMAGE**

Just what is Amateur Radio in the eyes of John Q. Public? I'm afraid our image is not what we would hope nor even what we might expect it to be. We might hope he would see us as intelligent, able electronic whizzes, building and repairing our own equipment and keeping schedules with people from exotic sounding places. We might expect that he would recognize the valuable assistance Amateurs give in disasters and the contributions of Radio Amateurs to electronic technology.

But does he? No!

Two examples in the past month point out clearly that the average person has no idea what Amateur Radio is all about.

Number 1 — In the comic strip "Steve Canyon," the cartoonist has Poteete Canyon seeking assistance on her CB radio and making the comment that she hopes some Ham hears her call for help. (Not impossible, by the way — there are Hams who also hold CB licenses.) But the point is — the cartoonist did not know the difference. Certainly he did not do his homework.

Number 2 — On the TV program "Room 222," the school had been given a broadcast radio station and were planning broadcasts. Mr. Dixon asked if anyone in the class had a license, and one of the boys said that he had a 3rd Class License. Then one of the girls remarked, "I didn't know you were a Ham."

Someone, somewhere should have caught these errors before they hit the public eye — but no one did!

How many of us have had a neighbor remark that her brother-in-law in the Midwest is a ham and ask if we can keep a schedule with him. Later we find out that he is a CBER or a SWL, or has a business license. The average person just knows we do something with two-way radio.

Even one of the proponents of the recent CB license tag bill did not know the difference between CB and Amateur radio.

What can we do about our image? Several things.

Support our club's public service activities — some of them are designed especially to acquaint the public with Amateur Radio — and see that club activities get good newspaper coverage. Some club activities we might promote are Field Day, Civil Defense, setting up a station to handle messages at a fair or some special event, Red Cross, Novice or higher classes, etc. We can invite others to radio club meetings and to other club activities. How about presenting a program on Amateur Radio to other civic clubs?

One of the best ways each of us can help is to be a good Amateur Radio operator and set a good example. Show friends and neighbors our equipment and explain what Amateur Radio is and what Hams do. Each of us should be a one man (or woman) ambassador for Amateur Radio.

(SLANT-BARS, WA4YNX EDITOR)

(Editor's Note: See 2 gals and a guy elsewhere.)

Complete packaged Multi-Band Antenna Systems employing the famous Bassett Sealed Resonators and a special Balun. Air has been evacuated from both and replaced with pure helium at one atmosphere.

Highly efficient system packages including all hardware, insulation, coax cable, and copperweld elements assembled at the factory. Complete installation instructions included.

Multi-frequency models available for all amateur bands and for commercial use, point to point, ground to air, military and government.

MODEL DGA-4075 — \$59.50

A complete system package for primary use in the 40 and 75 meter bands at power levels up to 4KW-PEP with secondary operation in other bands at reduced power levels.

MODEL DGA-152040 — \$79.50

A complete system package for primary use in the 15, 20, and 40 meter bands at power levels up to 4KW-PEP with secondary operation in other bands at reduced power levels.

MODEL DGA-2040 — \$59.50

A complete system package for primary use in the 20 and 40 meter bands at power levels up to 4KW-PEP with secondary operation in other bands at reduced power levels.

MODEL DGA-204075 — \$79.50

A complete system package for primary use in the 20, 40, and 75 meter bands at power levels up to 4KW-PEP with secondary operation in other bands at reduced power levels.

NOTICE TO THE FLORIDA SIDEBANDERS ASSOCIATION MEMBERSHIP

For some time now there has been various and sundry comments, remarks and discussion on the limited growth, loss of membership, disinterested attitude, apathy, etc., about the meetings and other 'going-ons' of the Florida Sidebanders Association. Ladies and Gentlemen of the FSBA membership, this is YOUR association, too! Not just the officers, you elected, are to blame for this degeneration but YOU who make up the roll-call of a Sunday afternoon. Or, worse yet, you who have joined, gotten your certificates and membership number, and then disappear — no longer to be heard from. I wonder if we were to call the roll ten minutes after the first roll call just how many of you would be there to answer the second time??

On Sunday, April 30th, meeting number 629 we heard an enthusiastic voice volunteer, "I'll head up a program committee to get something started." This volunteer was, you might say, a stranger in our midst. Does not belong to the FSBA and doesn't even have a '4' call. WA5ALN, Blake, at Key West, said he would take this job of trying to do something for you. He also asked "what is it you want?" and "who will help?" Now you members who have been certificated and deserted us get in there and tell Blake "I'll help," "I'll talk on my 'stamp collection,' 'breeding cats or dogs,' Golf, bowling, my trip to Tim-buck-tu or some other place. Just get in there and do your part. Don't be expected to be entertained by others and sit on your 'duff' and only criticize.

On June 18th, "Cuddy," WA4SII will give a talk on "Self Protection for Women." This should be of interest to the wife and daughters of you men members so get them in around the 'rig' and afterwards there will be a question-answer session.

Another thing that we have 'cooked' up and, although some what inconvenient to many of us, is a picnic-dinner outing planned for Sunday, June 11th at FLORIDA CAMPLAND located about five miles South of cross-state 50 on 98 or about 8 miles North of Dade City on 98. Many of the State Routes, 50, 98, 301, I-75 will get you very close to this area and the bill-boards

advertising the camp-grounds are many. Florida Campland is owned and operated by a Ham, Marty Nadler, WB4IUL, and is a very beautiful place.

Not what is this outing going to cost you?? Only half back per car and then we ask you to bring one large covered dish of your favorite salad, baked beans, cole slaw, tuna salad or dessert. If we can get a great many of you to come, a dinner of this magnitude should find no one going home hungry. Be prepared to donate a buck to the FSBA Fund. Don't know what we'll call it but we could buy flowers for any of our membership in the hospital, etc. Where else could you get a good meal for a dollar and a half, for a car full of people? Bring your own eating utensils and something to drink. You parents will have to be responsible for your children as the Withiacooche River is nearby. Practice up on your horseshoe pitchin' and we'll see who is the FSBA champ.

The date, June 11th — Dinner 1 p.m. — Florida Campland. The purpose, to get you, The Florida Sidebanders and any other Ham family together to do SOMETHING! How many will have an excuse to not be there?

"The things are mighty few on Earth

That wishes can attain.
Whate'er we want of any worth

We've got to work to gain."
(from Results and Roses by Edgar A. Guest)

By Case, W4NGR

SILENT KEYS

We are sorry to report the passing of the following amateurs:

K4ERN, John T. Murphy, Ft. Lauderdale.

W4PAS, Don H. Reed, Tampa.

W4QEM, Warren W. Sloss, St. Petersburg.

WB4CQU, Al Mann, New Port Richey.

W4BCB, Lloyd McBurney, Naples.

WA4NZI, G. Douglas Rice, Plantation.

K4HQA, Arthur J. Bond, St. Petersburg.

K4MA, Allan N. "Jack" Moore, Bradenton.

WA4BYI, Herman E. Croft, Pensacola.

W4BP, J. M. "Tiny" Smith, Mount Dora.

GOVERNOR REUBIN O'D. ASKEW signs our June 18-24 FLORIDA AMATEUR RADIO WEEK PROCLAMATION in Tallahassee May 1st, 1972. Our thanks to Jim Rozzelle, WB4GTY for taking care of details again this year. SKIP has free copies for a No. 10 SASE. Let's get all the publicity we can on this in the newspapers on radio and TV. Spread the word. **THANK YOU GOVERNOR!**

PROCLAMATION

State of Florida
Executive Department
Tallahassee

WHEREAS, the Florida Amateur Radio Operators are a highly important and vital link in the emergency communications network of the State, and

WHEREAS, their service is extremely valuable in times of turbulence, death, destruction and devastation, and

WHEREAS, said service is immeasurably enhanced by their dedication to their avocation and the facility and expertise they demonstrate in the practice of said avocation, and

WHEREAS, their service offers many intriguing and unusual communications situations, the fascination of which they share with thousands of friends and fellow operators, and

WHEREAS, through their affiliation with the Amateur Radio Public Service Corps and the Radio Amateur Civil Emergency Service, Florida's amateur operators are continuously alert to offer additional communications service when the country faces a national emergency, and

WHEREAS, annually, Florida's amateur radio operators set aside a week to review all aspects of their avocation and its contribution to humanity;

NOW, THEREFORE, I, Reubin O'D. Askew, by virtue of the authority vested in me as Governor of the State of Florida, do hereby proclaim the week of June 18-24, 1972, as

FLORIDA AMATEUR RADIO WEEK

in recognition of the conspicuous and outstanding service of the Florida Amateur Radio Operators to the State and its people.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Great Seal of the State of Florida to be affixed at Tallahassee, the Capital, this 1st day of May, in the year of our Lord Nineteen hundred and seventy-two.

ATTEST:

Richard (Dick) [Signature]
SECRETARY OF STATE

[Signature]
GOVERNOR

TRIBUTE TO ROLAND B. BOURNE, W1ANA

By Arthur H. Lynch, W4DKJ, Cape Coral, FL

Though he played many, many important parts in the forming and guiding of the American Radio Relay League, many present members have little knowledge of the reasons they and the A.R.R.L. owe him great praise and thanks!

Nor is it possible, in a brief review like this, to do him even a token of our appreciation and gratitude!

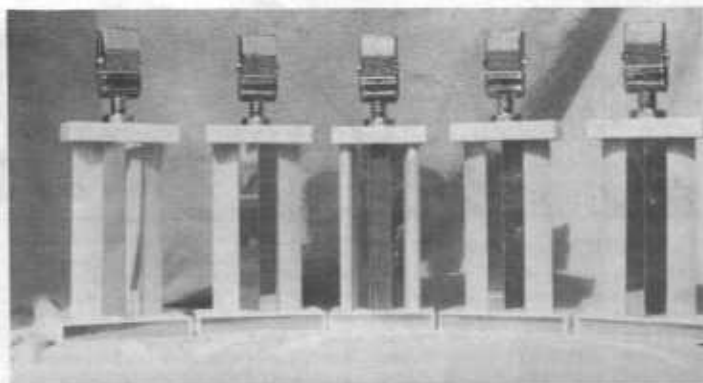

It happens that, because of my association with companies some of which, by reason of the skill of some of their engineers, whose technical articles aided greatly in making QST, the outstanding, international technical periodical it became, but also, whose advertising money helped keep the wolf from the door, that I dare to make the following remarks! National Co., General Radio Co., Raytheon Co., Browning-Drake Co., were a few of the New England folks whose frequent visits, from New York, took me through West Hartford, where stopping for a visit and lunch with the A.R.R.L. crew was quite a regular thing.

Roland, even in the old days, always kept his eyes open for anything which would be helpful to the A.R.R.L. and QST. It was largely through his efforts — though he seldom made it known — that some of the League's most important contributions to "ham" radio were inspired by him!

Just one indication of that sort of activity, on his part, is his letter to me, of February 19, 1968, which was one of his last official acts, of the "League."

Of course, presenting the unit he mentioned was considered a great honor by me, particularly as Roland accepted it at a meeting of the "GOLDCOASTERS," where one of the best-known "amateurs," Paul Godley, who received the first official trans-Atlantic signals and Ray Guy, founder of the "GOLDCOASTERS" and Past President of the Veteran Wireless Operators' Association, were present!

It is with great admiration and gratitude that these remarks are passed on for Roland E. Bourne, W1ANA, to whom we all owe much.

HERE ARE THE FIVE FLORIDA SKIP QSO Party trophies which will be awarded at the 1972-1973 Miami Hamboree. Winners are High Single CW Operator K4JWM; High Single SSB Opr. WB4EYX; High Out of State CW K4LDR; High Out of State SSB WA6PGB; High Club Aggregate Score W4EHV. (Fla Skip Photo)

ORLANDO ARC

By Herb, W4LSR

Our April meeting was centered around our forthcoming hamfest, as it is every year at this time. Monty, K4VFW and his committee members reported on preliminary activities, and all seems ready for the big event.

Among our visitors was our neighbor from Deltona, Jack Six, W4YPA. He was most welcome. Six new members were voted into the club.

Mike, K4FCS, who teaches code at our code and theory classes reported good progress. Doc, W4ZVV, reported on the new Prestige licence plate law passed by the state legislature. Charles, W4FZX, gave us a brief but interesting report on the new Orlando repeater which was donated by Reppo and built by Bob, W4POZ, for the Central Florida Repeater Association whose membership includes many of our club members.

Jess, W4CLJ, and his Agnes spent a pleasant week in Kentucky visiting family. L. J., W4WSO, and his Betty are expecting their daughter and her family to visit them. Our perennial temporary resident Nat, W4YSO, has left for the Tennessee mountains to get his travel trailer set up for the summer. He plans to return for the hamfest and then back to the summer place with his Thora.

See you next month. 73, Herb.

DADE RADIO CLUB, INC.

By Hank Schueler, WB4MYX

Sorry about the BooBoo on the date of the club dinner and installation of Officers. Was very gratified to find that some of the club members actually do read this stuff. Would hardly think so from the lack of reaction at the meetings. Being correspondent is sort of like being a dentist, you have to pull out and then fill in.

We have five new Novices as a result of our Code class. Classes will continue for new applicants and anyone wanting to upgrade his present rating.

The members voted to support the Crystal Pool for the QFTN traffic net.

Because of a case of insufficient manpower at the time of the G.O.P. con-

vention, due to vacations, a request to sponsor a communications center during this affair, under the proposed call K4GOP, was turned down after considerable discussion. Equipment for Field Day is being lined up and it looks like a pretty good coverage of the ham bands is in prospect. Probably won't be much news until after Field Day.

GULF STREAM SOCIETY OF RADIO OPERATORS, INC.

By Bertha Farr Eggert, W4BMC

At the April meeting of the Society, Slim, W4AAZ, proposed, and Mark, K4BDI, seconded that Larry Martin, W4COE, be accepted as a new member and everyone welcomed him. Glad to have you, Larry. Mrs. Schofield, widow of Ed, W4ZHI, wrote a letter, thanking the Society for the help in disposing of Ed's gear.

Jay, W4VTJ, was on a program on Channel 12, on April 16, at noon, explaining his efforts to Copy the Apollo 16 on 2287 Mc. The program was called, "A Ham's Idea of Apollo 16." Jay was able to see the audio signal on a scope, but was not able to hear the audio. This was confirmed by the Cape.

Bob, WB4AIF, and several other members are going to put a HF Antenna up on the Civic Center Building in Lake Worth, where we hold our meetings.

In the next week or two, our Repeater Receiving Antenna should be moved to the new site. At the May Meeting there was a good bit of discussion about this move, and the phone lines and the coax. It will be good to have this receiver antenna at the new site and at the new height.

The South-East division Multi Operator Class winner of the ARRL Sweepstakes were Neil, WB4PKP, Tom, WB4OPI, Bill, WB4OUH and Arnold, WB4PKO. Congratulations, fellows.

BROWARD A.R.C.

By Jim Wilson, W4GDK

The members and officers of this Club join in expressing the hope that the world famous Florida SKIP can continue. We would be lost without it.

Our Club, as one of many clubs in Florida, feels that a lot of our growth has come through publicity in SKIP.

We know what a big job it is for both Betty and Andy, but be assured your

sacrifice is not unappreciated.

FLORIDA SKIP is the most widely quoted ham magazine in the country.

We do hope you can continue and we congratulate you on your past accomplishments.

DADE COUNTY AMATEUR PUBLIC SERVICE CORPS

By George Nehley, WB4ONR

DCARPSC members agreed to back W4ILE 100 percent in his efforts to get something started in establishing a Crystal Bank for the QFTN Net that meets daily at 0200 GMT on 3715. It seems like a very worthwhile venture to have a good supply of these crystals on hand for loan to any Novice that would like to get a taste of Net Procedures.

W4ARRB reported that no less than 28 Novices took the exam for their Novice License. This is terrific and all the members that were involved in running these classes are to be congratulated for a fine job.

Our participation in the recent Florida QSO Party was not too bad at all and there is a possibility that we are in the running for club aggregate consideration. No matter how the results come out, it is agreed that it was a lot of fun.

Plans are getting under way to put the club station W4EHW on the air for Field Day during the weekend of June 24-25. All members and friends that wish to lend a hand in this event are requested to contact the Field Day Chairman, WB4ONR, and put in your bid for whatever suits your interests. Any ideas, inventions or gimmicks that will work in the field will be appreciated.

Norm Kaplan has been in the hospital in serious condition but there is a chance that he is going to be OK and back with us again.

SOUTH FLORIDA F.M. ASSOCIATION

By Joyce, K4EER and Woody, K4EBK

In April the SFFMA was treated to a fascinating demonstration of the LASER beam, by Dr. Hirschberg, Director of Physics at the University of Miami. The meeting was held at the University Physics Complex. Dr. Hirschberg completely captured the 65 members present with his teaching techniques and his display of the LASER and the Hologram (3D LASER picture). Our thanks to Rob, K4RDR for his assistance in setting up this fine club meeting.

Perhaps you've noticed our signal has improved. Well, thanks to Joe, WB4HIS, Don, W4AJBI, and Rob, K4RDR, the transmitter and antenna site was moved on RAINY, RAINY, May 6th and 7th. A 9 DB gain antenna now rests at the 200 ft. level at the university. Wait until we go to high power!!!!

Remember the SFFMA picnic on June 18th, at Matheson Hammock.

Meetings of the SFFMA are held on the third Monday of each month at the University of Miami. Visitors are welcome.

WEST PALM BEACH ARC

By Bill Sprague, WB4OUH

From the desk of the new scribe comes this month's news. Our annual election of officers just completed, brought a new slate of club representatives: Pres. Jesse Knight, WB4PPW, Vice Pres. Henry Felton Jr., W4HXZ, Secretary Bill

Sprague, WB4OUH, Treasurer Ed Leger, WB4SNL.

The club wishes to thank the exiting officers for their fine service in the past year, with special thanks to our outgoing secretary Clara Stables. Surely we will miss her poetic and fluent way with words.

George Clark, WB4TAF, recently bought a new house with special provisions for a super "ham shack," and is just about ready to hang the sky-wires. Clara, WB4NXX has just completed working her WAS and received the award. Nice going Clara!

EC, Lu Arendell, WB4RLU, and his assistant Carroll Turner, W4MML, are progressing rapidly with a communications plan and practice for Palm Beach County. Along with Bill Howell, WB4PQB, Red Cross Communications Liaison Officer, tests were conducted May 8, 1972, from Belle Glade and the east coast on 75, 6, and 2 meters.

Again the club plans to operate from MacMillan's Island on Field Day. We hope to beat last year's score and possibly take home the Florida Skip Trophy.

WESTERN FLORIDA NEWS

By Frank M. Butler Jr., W4RKH

Pensacola: I regret to report W4BYI a Silent Key last month. WB4DHL has a 6m FM repeater going: 51.965 in and 52.525 out. K0BAD-4 made a club interest survey of all FFARA members, with results published in the W4UC News.

Milton: New club officers are: President, K4HOX; plus K4QOJ, WB4JRP and K4BDF. Meetings are first Monday of each month at PJC Milton Center. The Whiting Field club, ex-W4POY, is being reactivated as WB4QGT. K7ZCK-4 reports they have a new S-Line and TA-33 beam.

Ft. Walton-Eglin AFB: WB4KLT repeater frequencies were changed from 34.76 to 39.79 to avoid co-channel interference and be compatible with national repeater standards. W4BPJ is recovering from a heart attack. K4CLM, W3ZBW, W3ZVT, K4UBR, WB4PFV and WB4VUP provided communications on 2m FM for a 2-day sports car rally. WB4ZKK is a new ham in Shalimar.

Panama City: New graduates of K4AH-V's classes are W4YXE, W4ZFY, W4ZHR, W4ZMP and W4QEI-4. K4VFF is now the Net Mgr. for QFN.

Tallahassee: WB4GTY reports that hams can continue to get call-letter tags for \$1.00 extra, even though the CB tag bill passed. It looks now like the repeater sight will be atop the new Hilton Hotel. A new code and theory class is in progress at the Red Cross building. W4VPL is active on QFTN.

HOLLYWOOD AMATEUR RADIO CLUB

By Minnie Levine, W4RLS

Congratulations to Kim, WB4LZQ, for getting his second class phone license, and to Alice Stracuzzi who is now W4ZTC.

Field Day site will be Young Circle in Hollywood. HARC will be there in full bloom.

WB4TON made a terrific showing in the November SS, finishing in the top third of the nation.

Tom, WB4CKY and Joy, WB4CKK, are leaving Hollywood for an extended vacation trip through the country. They will operate on the high end of 75 and 40, between 7:15 and 7:30 P.M. local time and hope to contact all of you. They should be back before the year is up.

QUADS! QUADS! QUADS!

Prices are for complete quads. Enjoy all the advantages of a full-sized quad. All quads complete with hardware. Noisy locations our specialty.

F.O.B. TAMPA, FLORIDA

(813) 988-4213
496 Bon Air Ave.
SKYLANE PRODUCTS Temple Terrace, Fla. 33617

Ted, WB4SAC and Georgia, WB4WTX got a new motor home and are planning an 18-month tour of the U.S. We will miss them all.

WB4LAX finally got his antenna up and in working condition. His XYL thought it would never happen.

Our July meeting will be a picnic, to be held on July 16 at T.Y. park. There will be talk-in on 146.94 FM and 3940. Extra added attraction will be a real amateur topless go-go dancer contest. Contestants please apply to WB4HML. Be an active member — it's fun. Visitors are always welcome at our meetings.

Q.C.W.A.-SUNCOAST CHAPTER

By Bill Soehl, W4GHR

It is with deep regret that we report the passing of K4MA, Jack Moore, of Bradenton, on Monday, May 1st. Jack was a Charter Member of the Suncoast Chapter and when we first visited him, we not only found him to be a real gentleman, but also an ardent booster for a QCWA Chapter on the lower West Coast of Florida. Though a Charter Member, he was unable to attend any of our meetings because of his illness. He will be missed by his many friends and Q.C.W.A. members. Our deep condolences to Lenore, his XYL and family.

Through printing error the following was deleted from the May report: "W2SAW, Sax narrated some of the slides taken when he was a member of a DX-pedition to Sorroco Island, off the Mexican coast. Sax did a fine job and his show should come under the banner of 'Trials & Tribulations of a Ham on a DX-pedition'."

The Suncoast Chapter phone Net on 3965 KC, will be discontinued for the season and will be re-activated in the middle of September.

QCWA GATOR CHAPTER REPORT

By K4PI

The April meeting of the Gator Chapter of QCWA was held on Saturday, April 22 and consisted of a boat trip from the St. Petersburg bayfront dock on the excursion boat to Bahia Beach. Fifty-five members took part in the trip and were joined by twenty-seven others at the excellent restaurant on Bahia Beach where the

business meeting was conducted. After the business meeting members enjoyed a cruise up the Manatee river and viewed specimens of wildlife enroute.

The next meeting will be held in conjunction with the all-QCWA-Chapter luncheon during the Orlando hamfest at the Howard Johnson restaurant north. There will also be a final meeting in June at the Causeway Inn, Tampa, on the third Saturday unless further advised.

TAMPA AMATEUR RADIO CLUB NEWS

By Frank Shannon, K4GT

TARC's annual Installation of Officers Dinner-Meeting was held Monday evening, April 17th, at the Causeway Inn, Tampa. Our Past-President, Frank Ziegler, K4EUK, was the Master-of-Ceremonies, and Frank performed in his usual excellent manner. His dry humor was most entertaining. Our usual gang-singing leader, Ray Murphy, was conspicuous by his absence. However, many of those attending were called upon to say a few words — and numerous jokes, etc., were passed around for some belly-laffs. Our new President, Al Cito, WA4MXV, tookover the podium, following Frank Ziegler, and he outlined his plans for our future meetings, etc. All-in-all, we had a very pleasant evening!

TARC, following the excellent code and theory classes just recently completed under the tutelage of Seward Van Patten (code instructor) and Ray Murphy (theory instructor) has commenced a second series of classes. George Orth, WA4THT, is instructing in code on Tuesday evenings, 7:30 P.M. local time, and, our President, Al Cito, WA4MXV, will teach theory classes on Thursday evenings, 7:30 P.M. All classes will be held at TARC's clubhouse on Davis Islands, Tampa. Instructions are FREE!! So, tell your friends — beginners — or "upgraders"! Classes have just started. TARC's picnic-meeting will be held Saturday (Noon) June 3rd, on our clubhouse grounds, Davis Islands. Bring the family!

BARS

By Wayne Tope, WB4TUP

It looks like BARS is going to have a busy month ahead. We are really looking forward to one of the best F.D. operations ever held. We ask that ALL members participate in this activity. Don't forget the BARS Camporee coming up — June 9-11 at Florida Campgrounds. There will be a ping pong tournament. (I hope there are no By's there.) There will be a 2 mtr. hunt,

campfire sing and pot luck dinner. All Hams are invited (not just BARS members)!

Your editor would like to apologize for not putting an article in Skip last month! Kudos goes to Ralph, WN4TUR for passing his General Ticket.

Do any of you fellows out there have junk laying around the shack that the XYL has been wanting you to get rid of for years? Then call BARS — we will pick it up! Also if you need a tube which is hard to find try our tube collection — 25c might buy that rare one! See Don, WB4MVM, for all tubes.

FLORIDORA NEWS

By Charlotte Frazier, WB4PEL

The Floridors welcome WA4OWW, Perna Paulus and WN4ZHG, Louise T. Carpenter.

K4WXS, Lee has been hospitalized for surgery. She is doing well and hope her recovery is swift and soon she will be able to resume her normal activities.

There were six Floridors at the Clearwater Amateur Radio Society's picnic: W4BIL, W4GPX, WB4FVN, WB4PEL, WB4WPZ, WB4YSD. We posed for a picture and had a real long "eye ball" QSO.

We extend our sympathies to W4WPD, Shirley Hill in Tampa who lost her father, and to W4TDK, Naomi who lost her sister-in-law recently.

WA4FJN, Rosalie and WB4PXN, Nesta enjoyed a bus tour to Disney World. WB4PEL, Charlotte went to New Jersey to renew many friendships. She also visited in Dover and Milton, Del.

At the SPARC Hamfest the girls got together for a very pleasant talkfest. I regret I do not have a complete list.

This will be my last column and I want to thank all of you who have kept me posted on the many activities of our members this past year. Good luck in the coming year.

SUNCOAST ROVING REPORTER

By Cathy Soehl, WB4BAV, ARNS

SPARC has a new meeting place: Red Cross Hdqtrs., 818 - 4th St. No., St. Petersburg. Meet 1st Fri. each mo. 8 p.m. The Citrus Amateur Radio Assn., a new Club, covers Citrus and adjoining counties. Meets 6:30 p.m., 2nd Wed. each month, Colonial Hotel, Inverness; Net 9 p.m., Weds., 28650 kHz. Pres., W4LIN, Larry Garland; Treas., K4CVO, Walt Nimmman; and Sec'y., W4EWS, Dick Lahey. Mail add. Rt. 1, Box 117-D, Floral City, Fla. 32636. Congrats & good luck!

WB4CQU, Al Mann joined the Silent Keys April 18th. He will be sadly missed and was known to many as "Keeper of the Screws & Nuts" on the Michigan Screw Ball Certificate.

WA4KPY, Neil Boyle and XYL Margie, find the house kind of quiet since their son is in Okinawa, with the Air Force and daughter is married and living in Osprey. Neil back on 6 meters.

K4HQA, Art Bond and KAMA, "Jack" Moore recently became Silent Keys. Our heartfelt sympathy to their families. Art did much to help the hams and was noted for the "Art Bond Ground-Plane Antennas" he made for many. W4BAV, Cathy is only one who will always remember Art and be always grateful for all he did to get her on the air.

WANMU, Fred Harriman is instructing a class in Radio at the Dixie Hollins School. Among the members of the class are: WANOK, Jack Adams (to upgrade license) and Betty Peters, XYL of K4RKY. Good luck to all!

K4GGD, Jack and June Dyer gained a son, April 30th, when daughter, Debbie, took the marriage vows. Congrats.

SOUTH MIAMI RADIO CLUB

By WB4JFA

The club has held its second meeting at our new location, the National Hurricane Center and the turnout has been on the upswing with a number of new faces dropping by to look over the club and think about joining.

We discussed Field Day at the last meeting and a site has been obtained and we plan on putting the club rig on the air. We decided to invest in a new vertical antenna for the occasion and we may have on more than one rig on the air.

We had our last social meeting at a restaurant and about a dozen people attended for supper and a eyeball QSO after the meal. The XYL's enjoyed it the most and they found that ham radio is a lot more than operating on the air.

We would like to invite all hams in Miami and Dade County to visit our club on the First Friday of the Month at 8:00 P.M. On a closing note, the club will suspend meetings for the months of July and August, but will activate the weather station if a storm would arrive.

COUNTRY COUSINS

By Stan Offenhutter, K4BLM

Our annual meeting was held at the Orlando Hamfest and the new Officers were installed. Good luck to them for a (Continued on page 8)

successful and productive year, and may we applaud the out-going Officers for a job well done.

Your new Correspondent will be Jack Hartley, K4WSB, Secretary and Treasurer.

Al, W4BHF and Bob, W4JWP are back after having spent two weeks traveling, visiting friends and relatives. Congratulations to Will, W4VWY who became a great grandfather for the third time, but this time it was a girl! Congratulations to Coleman, WB4OKS ... he passed his extra class license examination! Who can be that smart?

Lee, K4WXS who underwent two operations is recovering very nicely, for which we are delighted; cards were sent to her and we wish her a speedy "get well."

It is with great sorrow to report the passing of one of our faithful Cousins, Jack Landers, W1AD, also of Evelyn Ireland, the XYL of Ward, W4CSU. May they rest in peace.

A big welcome to our latest new Cousin, Ed, K4DRH, it's nice to have you among us Ed.

A special "thanks" to the Editor of Florida Skip, Andy Clark for making it possible to bring you this column for the past two years; it has been a most enjoyable association for me.

A welcome to all to join us every night at 10 p.m. EDST on 3970 JHz. A certificate is given by the Net. Please check in for further particulars.

ST. PETERSBURG AMATEUR RADIO CLUB

By Cathy Soehl, W4BAV-ARNS

The SPARC Hamfest was its usual huge success, held May 7th, at Lake Maggiore. There were 423 signed in (which did not include the members of each family).

There were more than 100 prizes and many went home with several, while others, like "yours truly," had only their string of tickets. The big prize, a Galaxy FM-210 2-meter transceiver, was won by Ivan Loo, of Brooksville. Ivan is an old timer, has commercial license and awaiting his ham license.

W4DQS, Dale Strieter, our ARRL Director, gave a rundown on some anticipated changes, etc.

W4ILE, Regis Kramer, our ARRL SCM, reported on activities past, present and more participation and cooperation in the future.

K4FCW, Jim Keys, W4CXL, Jack Faustich, with W4WME, Bill Foley and several others, did a fine job MCing and distributing all the prizes.

The Shelter housing the Swap Shop was a popular place and there was much "wheeling & dealing," as well as "window shopping" done.

The gals at the registration desk, headed

FIVE OT'ers SWAP GEAR AT GOLDCOASTERS dinner (l. to r.) Paul R. Godley, Arthur H. Lynch, W4DKJ, Ray Guy, W4AZ, the late Roland B. Bourne, W1ANA and George Ruos, W4OIY. See Tribute to Roland B. Bourne by W4DKJ elsewhere. (Photo by H. Muller.)

by W4TDK, Naomi Spence, did a major job collecting monies on registrations, selling extra tickets and seeing everyone signed in, etc. K4WXS, Lee Kanarian, who "spear-headed" donations for the Ladies' Prizes, was missed, as she was in the hospital, doing nicely after surgery. Lib Franklin, XYL of W4KC, took over for Lee, the tickets sold for these prizes. Congrats to all for a wonderful hamfest!

MANATEE AMATEUR RADIO CLUB

By Harry Lord, WB4OTJ

The club is starting the 1972-73 year with 47 members. New officers are Milt Sebelik, WB4QQG, President; Norman Rosedale, WB4HZE and Harry Lord, WB4OTJ, Vice Presidents; Rick Dove, WB4ROX, Secretary-Treasurer; 'Birch' Birchfield, WB4AIW, Activities Officer. Rick, WB4ROX, just received his General and to cap it off we made him Secretary-Treasurer. Since he is a minor (freshman in High School), Harry, WB4OTJ, is helping with the treasurer's duties.

'Birch' is Civil Defense Radio officer and has enlisted 16 MARC members in the RACES program with on the air meeting every Wednesday at 2000 local time. Net operates on 145.41 MHz but steps are being taken to see about feasibility of supplementing the 2 meter net with more

common frequencies on the 3.5-4.0 MHz band.

We hope all county hams who read this in 'Skip' will come to our meetings held at the American Red Cross Headquarters on the last Monday of each month.

SARASOTA AMATEUR RADIO ASSOCIATION

By Cathy Soehl, W4BAV, ARNS

At the Club's April meeting "A Juicy Story" movie was shown by Dr. Bonnell, of Tropicana. It revealed all the process, from the picking of the oranges through to the bottles, which they also manufacture, in which orange juice is vacuum packed.

WB4JFK, Bill Dougherty, WB4LYU, Jim Cain and K4DYB, "Ozzie" Osborn have been working hard getting arrangements made for Field Day operation. Hope all members will cooperate and a good score is made.

WB4PIB, Walter McLennan is on 2 meter FM, with a Drake ML2 and Chris-Craft 10 element beam.

K4GKI (ex: W2GYG), Win Morris has had 1,780 contacts with W6EJ, Bob Palmer, in Calif., since 1938.

Everyone is welcome at the Club meetings, held the 3rd Tuesday of each month, 8 p.m., at the Sarasota Federal Savings & Loan, So. Trail (U.S. 41) and Bee Ridge Road. May meeting will feature an AAA file on "Trip to Hawaii."

EMERGENCY COORDINATORS NEEDED

Eastern ARRL Section of Florida needs the following counties covered: Baker, Charlotte, DeSoto, Flagler, Gilchrist, Glades, Hardee, Hernando, Highlands, Lake, Levy, Marion, Martin, Monroe, Nassau, Okeechobee, Osceola, Putnam, Sarasota, Seminole, Suwanee, Sumter and Union.

With the thousands of amateurs we have in these counties, don't we have just one each to take the EC job? The three main requirements are: Hold a Technician license or better, be a full ARRL member and be willing to set up a amateur radio emergency communications within your county. Does that sound hard to do? Any amateur worth his salt can do that! For applications write: A. C. Clark, W4IYT, 41 Lenape Drive, Miami Springs, Florida 33166. TRY IT YOU'LL LIKE IT.

EX CALLS

It is safe to say, FLORIDA SKIP has published more ex-calls than any other publication in the world! Have you sent in yours? Editor.

VHF'ers COLUMN By Frank Shannon, K4GT

Silent Key, Al Mann, WB4-CQU, of New Port Richey, passed away April 17th. Al was very active on 2 Mtr. FM and a member of the well-known Medicare Net on 6 Mtr. SSB. We will miss Ole Al!! He died of lung cancer. Your Scribe attended the funeral services, along with K4ATW and W4BUJ. The Medicare Net members joined in flowers for Al, also participated in donation to American Cancer Society in his memory.

PUBLIC SERVICE. Tampa Bay

Repeater Association has added another to its long list of such public services — this last one had a goodly number of membership participating as "communications-coordinators" for the recently held, Saturday, April 29th, "clean-up," Project SOAR (Save Our America Resources). The cities involved were Tampa, Brandon and Plant City. Some 4,000 Boy Scouts, Cub Scouts, Girl Scouts and Brownies participated in gathering up litter and trash from the streets and environments — some 42 tons in Tampa and Brandon, not including Plant City!! Jim Hinchey, K4RMU, President of Tampa Bay Repeater Association stated that some 15 TBRA members, plus two volunteers from Univ. of South Florida Radio Club, participated with their respective mobile and portable rigs. Quite a communications coverage! A

FLORIDA QSO PARTY REMARKS

"Fine contest, plenty of Florida activity which made it interesting. W9J00, Wabash, Ind. ... Very good QSO party, bands conditions were not as good as last year but had more time and better antenna. Bob, WB0CCB, Denver ... Excellent participation. Short of time due visitors. Larry, WB6IEH, Midway City, Calif. ... Thoroughly enjoyed Party and think it is one of best in country. Band condition in early part were lousy and 10 and 15 being dead. Ad my score to Hollywood Club aggregate score. WB4H-ML, Hollywood ... FLORIDA SKIP announced its annual SQO

Party in April QST, but made no mention of info to be exchanged between station. Also, what happened to 40C.W.? Dave

WA1JSD, Derry, NH. (Editor note: We goofed on that and date. Sorry OM) ... Enjoyed it and congratulations to W4CKB the best fist and best signal heard 12 miles north of Mexico in Arizona. Bill, W7GAF ...

Really a fun contest. Got 10 new counties towards WSA-CA! Hope see you all next year. John, WB4RUA, Calhoun, GA ... Nice to have the opportunity again of participating in your Party. VE1EK, Halifax, NS.

job well done, fellas!! Now, let's hear from other VHFers regarding their public service activities — your Scribe would appreciate your correspondence, so we can use it in this column!

CLUB PUBLICATIONS. Thanks to K4ANW for placing us on mailing list for the South Florida FM Association! Read in aforementioned publication that the "Palmetto Amateur Radio Club," located in North Dade area, plans a "closed-repeater" (limited to 30 members!). The repeater is to be located in North Miami Beach area. For additional info contact Kris, W4ZHD — believe freqs are to be 25.35 — mmmh!!

WELCOMES TO 2 Mtr. FM: WB4HEA, Bill, of Madeira Beach, using a GE Prog.

100 Watts, to a commercial-type LP antenna. Invited Bill to attend our Tampa Bay Repeater Assoc. meetings held 2nd Tuesdays each month. Also, welcome to newcomer to our FMers, K4AGA, using an HR2A, to a Diplomat antenna. And, to Jim Brandl, WB4YPC, Tampa area, using the latest Clegg 22'er-FM both mobile and base.

6 Mtr. AM NET. Clearwater Amateur Radio Club sponsors a net called Early Birds on 50.7 Mhz, vertically polarized, weekdays commencing their roll call at 08.15 local time — AM, that it!!! Believe it or not, the net averages some 17 to 20 check-ins daily! Their NCS rotates every week — you are invited to join, anytime. Oh, yes, code practice on Tuesdays!

FLORIDA PHONE TRAFFIC NET

By CASE, NET MANAGER FPTN
Since the change to Daylight Savings Time we reword our call-up preamble to say "...AT ELEVEN HUNDRED ZULU OR ABOUT 3940 KHZ..." which is still 7 A.M. local time. Have a bad wrist from

autographing all those pictures in the MAY issue of Florida Skip. Can't say much about that New Broad Band Receiver they gave me to use. First time I used it, it shifted a little.

Birch, WB4AIW, should be back from his trip to Europe about the last full week in May. Roy, K4EJW, has a new novice in his neighborhood at Silver Springs. Her name is Louise and she is WN4ZJH as well as Roy's wife. Herman, WB4FJY, moved into one of those fancy condominiums that won't allow "unsightly" antennas of any sort so it was suggested that he put up an invisible one and he misplaced it and hasn't been able to find it since.

Stan, WA4VCK, is looking for a tower for his new location. Howard, WA4CIQ, said that the 1,000 foot tower of WESH-TV at Orange City is up for grabs. If Howard doesn't put it to use, Stan, think you could use it if the neighbors won't mind? And are we glad to hear Raye, K4YPN, of Inverness back on the "mike". He has been using his fist for awhile running about a hundred. No! Ten, No! That's it, one watt of high power. What some people will do to get on ham radio. (or their picture in Skip!) Fellows read Andy Clark's Editorial on page two (2) of the May issue of FLORIDA SKIP and take particular note of the last paragraph. Betty and Andy should be given a rousing and rising round of applause for all the hard work for 16 years of putting out one of the finest publications on Ham radio for you and me! My comment, Andy, if they stop FLORIDA SKIP IT'll become an illegal CBER. There just ain't nothing worse than that. Come on, gang, write to Andy and let him know how you feel about his comment.

Hope the lucky winner of the big prizes at the Orlando Hamfest are enjoying them.

FLORIDA MIDDAY TRAFFIC NET

By Herb, W4LSR

By the time this issue of Skip reaches you the Orlando Hamfest will be history. Elinor and I look forward to eyeballs with all of you who attend and we hope you will find the new location to be the best ever. Nat, W4YSO, our favorite snowbird, has flown back to the Tennessee mountains for the summer. A number of others who are active on this net each winter, have returned to their summer hideouts. what to believe. It is nice to know our legislators appreciate our Public Service efforts???

FMTN held 25 sessions in April. 751 stations handled 267 pieces of traffic. Average stations were 30. Average traffic 10.7.

TROPICAL PHONE TRAFFIC NET

By Scott, WB4PTH

Always willing to take the initiative, this station (with the assistance of our net manager, Anda, WB4NCH) will be informing you about the goings-on at 3940. The TPTN is a small but efficient phone net, and we meet daily (except Sunday) at 5:30 p.m. EDT.

Because this is our first article, I'd like to introduce our net: WA2AFL-4, W4BCZ, WB4EXN, WB4ICD, WB4OAA, K4OER, W4SCY, WB4SKJ, WB4SQA, WB4SZS, WB4UOC, and WA4WBM. Net control stations (Mon. thru Sat.) are: WB4PNG, WB4NCH, WB4PTH, WB4JSK, WB4VOS and W4SMK.

Our TPTN-QFN liaison operations have been pretty successful. There were a few misses early in the program, but we're pretty consistent now. Thanks to liaisons: WA2AFL-4, WB4NCH, WB4PNG, WB4PTH, WB4SQA, and WB4VOS.

Look for Dave, WB4PNG, to be starting a "DeLonga Net" pretty soon. Not only is his uncle a ham, but his 10-year-old brother is now WN4ZSE. Congratulations and welcome, Wayne.

NET CONTROL HEADACHE NUMBER 3940 ... The station that moves off to pass traffic, passes it, and then starts an unauthorized QSO with the other station while the NCS waits for him to return ... MORAL: Always return to net frequency immediately after passing your traffic. If you want an informal, ask the NCS for his

O.K. More than once I've had to hold 20 or so people on frequency for over 5 minutes while I waited for a needed station. —End of message, no more ... 73— Scott.

GATOR NET

By Ev, W4IA

With the advent of Daylight Saving Time and the approach of summer, 7 mHz is starting its yearly tantrums so far as GN is concerned. Attention is invited to the fact that when conditions on 7115 kHz are unworkable, the NCS shifts to 3651 kHz and carries on net operations. This will occur soon after the 0830 EDT opening of the net in most cases. So, listen first on 7115. If there is nothing going on or if signals are very weak, go on down to 3651 and look for the NCS. It happens on rare occasions that both 7115 and 3651 will be bleak. In such cases, and if you don't succeed in reporting into the NCS, let the net manager (W4IA) know and you will receive credit for a QNI that day. So, see you on 7115 and/or 3651. 73, Ev, W4IA.

FLORIDA FAA NET

By George E. Cooper, W4EH

W4EH Ham Tip ... If you have a 3-400Z or 3-500Z setting on the shelf due to a short. Try the following. Take a .80 to 100uf condenser, charge it with about 400 volts thence short the condenser between heater and grid. With a little luck the resulting spark will remove the short.

A special THANKS to John Schaffler, W4ASN, on his fine effort and hard work in having the "Federal Airways Get Together" at Leesburg, Fla.

John "Commodore" Zwaska, W4WKQ, with his new boat the BARBIE 8th heading back to his summer home in Shalimar, Fla. after spending the winter in Punta Gorda.

recently retired from the FAA and is in Florida looking for a permanent home. Welcome to Florida, Les.

Bill Smith, WB4BZW, with a new travel trailer planning a trip to Calif. and will take his recently acquired SB102 along. (Don't forget, Bill, to advise the FCC of your route of flight.)

I received a letter from Charlie Hess, W4POV, La Grange, Ga. This letter brought back many fond memories as Charlie, an old friend and former supervisor of mine and certainly one of the best in the business. Charlie says he is meeting the Monday FAA CW net on 14072 and also usually on at 1400 and 2100 GMT.

Would like any or all of the following old timers from the old Miami Overseas check into the Sunday net: Ollie Olson, WB4USF;

Theron Wheelock, W4DYZ; Pete Susko, WB4ICK; John "J1" Ilderton, W4GZQ. Last but not least, the Editor of Florida Skip, Andy Clark, W4IYT.

QFN REPORT

By WB4OMG, E.Fla. RM

This year, for the first time in several years, early QFN remains on 80 meters during Daylight Savings Time. With the downward trend in the sunspot count, most QFNers felt that 40 meter operation this year would generate more problems, rather than relieve us of any. As the sunspot cycle progresses to a null, its effects on QFN and the NTS are easily seen. During the summer of 1970, the early session of QFN operated on 7095 khz. We seldom had any trouble with long skip and

whenever we ran into trouble on 80 meters, a quick qny to 40 meters always solved our problems. Summer of '71 was somewhat different. We lost short skip on 40 meters early in the evening. Sometimes as early as 7:15 or 7:30. Whereas the summer before we often QNYed from 80 to 40 due to conditions, the reverse was true during the summer of '71. This summer things will be worse. With a still lower sunspot count, 40 meters will probably be unusable even during the early evening hours for paths less than 300 miles. If the going gets rough on 80 due to static or commercials, we're just going to have to try harder. We no longer have an easy way out of the QFN.

By chance if some non-traffic type should read this, you ever consider trying traffic? If you think you might be in-

terested, listen on 3651 khz at 7 or 10 p.m. EDST some night. If you want to know what traffic and public service is all about; a postcard to WB4OMG will bring you some information.

IS YOUR GROUND GROUNDED?

By Harry A. Cole, W4DLL

2213 Hennesen Drive
Clearwater, Florida 33516

Here is some advice for the Novice, as well as many of us Old Timers. Like thousands of fellow amateurs, I have depended for my station's ground upon that friendly and convenient cold-water pipe. It must be a good ground, because if you ever had the unlucky experience of handling some piece of faulty electronic or electrical gear and come in contact with a water-pipe and lived to tell about it, you are indeed one of the fortunate types.

Last year I bought a new brand-name SSB transceiver, which I used for several months, feeding a dipole and using a water-pipe ground. Results left a lot to be desired, plus such side effects as TVI, RF in my telephone and interference with my FM stereo receiver.

Soon after the first of this year I bought a high quality Tri-Band beam, rotor and 40-foot tower. Considerable improvement in signal reports was the natural result, but those "I" factors still persisted — the TVI, telephone and FM stereo. Something had to be done, because the SWR at my pet frequency was less than 1.1:1, with my lowpass filter and transceiver ground connection tied to my handy water-pipe ground, located just outside the shack window.

Ground? I thought more about this and decided that would be the first point to investigate. Browsing through the local department store one day, I spotted a ten-foot length of 3/4-inch copper tubing, which sold for about \$5.75 per length. I put one into my station wagon and headed home.

The first thing I did was to completely tin about one inch of the end of the copper tubing. I learned not to depend on my 100 watt soldering iron, so using a boost from a butane torch (my cigarette lighter turned up high), I got a smooth, even coating of solder over the end of the tubing. Next, I took two turns of about no. 8 copper wire (pre-tinned, of course) and wrapped it around the tubing. Again, with the aid of my butane cigarette lighter and 100 watt iron, I got a good, solid solder connection to the no. 8 copper wire.

Getting a ten-foot length of tubing into the ground could be quite a chore, but (I was told later), if you start by putting a water-hose at the top of the tubing (requiring the use of a stepladder) you can easily snake the tubing down into the earth, particularly if you have a sandy soil as we do in Florida. It could present problems in areas of the country where rocky hard-pan lies close to the surface of the earth.

Once I got the copper tubing down about three inches below the ground's surface, I clipped one ohmmeter lead to my new "ground" and the other lead to my convenient water-pipe "ground." The meter showed a difference of 55 ohms! (And all this time I thought I had a good ground.)

Once establishing a really good ground, I ran leads from the

ground point to the base of my tower and to the window entrance to my shack (all under-ground and buried) so my XYL would not object to an unsightly mess of wires in the yard. She is happy, and so am I.

Now, with as nearly a perfect ground as I could get, the "I" troubles have disappeared from the TV, telephone and FM stereo. The only "I" problem remaining is "HAI". I can't keep my signal out of Grandmother's Hearing Aid!

This grounding situation could be improved upon by running a group of radials out from the ground rod, but this will come later when enough copper wire and ambition are available to me at the same time.

A few words of caution are in order. If you use a conventional 3/8" diameter copper-plated ground rod or galvanized water-pipe for your ground rod, you may expect (particularly in sandy soil) for abrasive action to cut through the top coating, only to cause problems of corrosion-rust to develop in a few years. The copper tubing is relatively inexpensive, and has a much longer life expectancy, so that it's initial cost far outweighs it's initial performance and life expectancy.

To summarize, if you want a "grounded" ground, forget about your water-pipe and put in a good (and low-cost) ground system. It doesn't cost too much to go First Class.

TWO GAL'S AND A GUY

By Al Suhr, WB4AID

It was a beautiful day, not much was going on — knock on the shack door. It was my neighbor, Roland Pinder, President of the Singles Club of West Palm Beach. Wanted to know if his group could have a demonstration of Amateur Radio Operations. Since I was then working ten meters on long skip, I said OK. Date was set for April 23rd, the request being made on April 2nd. Since the president is my neighbor, it looked like fun.

Many days passed. Ten meters appeared to be in fine shape. Seven days before the

23rd something happened up there. The band dropped out of sight, even short skip didn't seem too strong and it looked like a 'no go' on ten. I happen to be a ten meter nut and I was hurt at being let down. Really worried, too.

Well, a commitment has been made, so XYL Jane and daughter Carol were asked to assist as tour guides. We took 156 of the nicest QSL's and mounted them in plastic holders and then these were attached to an eight foot one by two and suspended outside on the patio wall. Boy! That made it easy for the girls to explain much of Hamming before each small group visited the shack.

Ten meters made an amazing recovery on the afternoon of the 22nd and, by the morning of the 23rd, showed great promise. Sure enough, from two 'til five, the five groups of three heard Amateur Communications with HP1GU, YV7AV, VE5BP, W8CJW and WA0YML, who indicated their desire to assist.

Of course, WA4TBN of Lake Worth and WB4RLU of West Palm Beach were sort of standing by just in case problems arose. Certainly appreciate their consideration.

It was a "mini show," but it was lots of fun, and fifteen or more people were introduced to the Brotherhood of Amateur Radio from the station of WB4AID, Lake Worth, Florida.

NORTH FLORIDA NAVY MARS

By Bonnie Wieboldt,
N0PJQ, WB4FSF

Chief Poston, our District
Director is making plans to
attend the Orlando Hamfest.
Frank Morrison, NAV-6 is
hoping to make the event also,
but is not certain as to whether
or not he will be able to attend.
All hands should attempt to be
on board for this meeting as it
will be very informative for all.

All stations should note that
the code "DOD-316" should be
placed on the franked envelopes
directly underneath the eagle
on the envelope.

We have several new stations
in the North Florida Area. They
are: N0s-RAP, ZFL, UIO, UFO,
SXM, SWK, SUQ, SIR, SEO,
RTD, LUQ, and JGZ. All net
control stations should make
note of the new stations and
their locations when they check
in on the nets, and attempt to
send the traffic to them, rather
than continuing to send it to the
stations who have been taking it
for long periods of time. This
will keep the new members
from becoming discouraged.

Jim, N0LNB is now on
teletype. He is also our new
Emergency Coordinator for the
area. Way to go, Jim.

All stations should attempt to
use the outlined procedures in
DNC-8, so we can set a good
example for the new stations.
MARS procedure is not dif-

improving, as is the traffic.

AIR FORCE MARS

By J.R. Hopkin Jr.,
WB4BND, AFC4BND

Let's pat a few people on the
back this month. We'll start
with our hard working CW mode
manager, Ken Gennett, AF4ME
(W4ME). As you are no doubt
aware, CW is becoming a lost
art. The Air Force is phasing it
out as a primary method of
communications but Ken and
his net keep going along full
speed as before. Besides being
mode manager, Ken is also
running a training net for new
CW operators on frequency
7330.5 Saturdays from 2000 to
2100 Z. As training manager for
the region, I get his training net
reports and can assure you CW
is far from buried at the present
time. New people keep showing
up and joining in. A lot of
novices join the MARS ranks
this way. Perhaps by this inter-
est, Ken can get them to
change their minds about
abandoning CW as proposed
now for the near future. I hope
so, as a good CW fist is still
music to many of us still.

Next, we give the RATT
(teletype) manager, Al Levy,
AF4NRE a thump on the back.
Since he has assumed the
managerial reins RATT has
made a great comeback after
many setbacks. With very little
assistance except among

themselves, the net has built
back up to where they have 32
active stations checking in
regularly. Having a permanent
frequency (4590) has also
helped. Lamar Hill, AF4BOL,
also runs a RATT clinic on
7330.5 immediately following
the CW training net for those
interested in participating in
the RATT mode of com-
munications. They are on lower
sideband for those not
operational on RATT yet. Listen
in sometime, and find out just
how hard these dedicated
people will work to help anyone
who is attempting to get
something working so they can
join the RATTACK.

NAVY MARS — SO. FLA.

By Jim Wilson, N0WCK

The Navy-Marine Corps
MARS operators of So. Florida
forego their regular column in
SKIP this month to pay special
tribute to two people who have
done much to develop our
MARS program — Betty and
Andy Clark.

As producers of that fine ham
magazine FLORIDA SKIP you
have contributed greatly to the
National Defense Program
through publicity given to
MARS.

We know this fine publication
is put out with great sacrifice by
both of you. If we could award a
Navy Cross you would each get
one.

We sincerely hope you can
continue SKIP.

The men from MARS

LETTERS

(continued from page 2)

feel I can no longer advertise my membership in the select group of Amateur Radio operators now that the Florida Legislature has decided that Florida should aggrandize and patronize a group, the majority of whom have no regard for law, order and Federal regulation.

I think C. J. Hoffman, K4RUG in his article in SKIP on page 13, has clearly tagged this group for what they are. Thank goodness, our "esteemed" legislators haven't gotten around, as yet, to make it mandatory that we, as Amateurs, must have call-letter plates.

However, there is one item in your editorial that I am not sure is correct and I think it should be explored. In so far as I know the 1972 Prestige Auto Tag bill passed by the Florida legislature does not affect or supersede the present legislation under which Amateurs presently receive their Amateur call-letter plates. If this is so, the cost to the Amateur should no change.

Granted that this won't last long — the CBers will holler if they have to pay more than those Amateurs who won't object to being categorized with them and continue to use call-letter license plates.

But what is of more than passing interest to most of us who have been residents for several years is the fact that a few years ago the Florida legislature passed a pay bill increasing their pay by 1000 percent and added beneficial extra emoluments. The reason given — This will enable the legislature to attract better qualified personnel as law-makers. The history of the Florida legislature, since that time, is replete with mistakes, bad bills, conflicting legislation, etc.

In my opinion, the passage of the Prestige Auto Tag legislation of 1972, by including CB operators within its

provisions is a typical example of the irresponsible, to-hell with Florida thinking of our higher priced "better qualified?" legislators.

Sincerely and 73,

Al Marcy, W4ID
Eau Gallie, FL 32937

Editor:

I wonder if any of the readers of FLORIDA SKIP could give me the address of Mr. Roy Niehaus, formerly W0FEU of Florissant, Mo.

Roy and I are old friends and were employed by Autotronics Corp. in Florissant. Roy moved to Florida over 6 years ago and I do not have his Florida Address. Can anyone help me?

73,

A. Edw. Terpening, W4VCY
838 Darlington Road
Tarpon Springs, FL 33589

Editor FLORIDA SKIP:

No better way known to the writer may the Florida Amateur Radio keep informed than through the pages of "FLORIDA SKIP."

In reference to your May Editorial I would like to comment:

Now the CBers have the privilege of using their automobile license plates to display their call letters let all Florida Hams stop using our call letters displayed in a similar manner. The public, and the Ham Fraternity need to know and have publicized just who is causing 99 percent of the TVI for which the hams are blamed.

We, of the Citrus Amateur Radio Association, live in a TV fringe area. Our nearest TV station is more than 50 miles distant. CBers with equipment about which a scarce few know anything, with their over modulation, spurious radiations, illegal power and operations are causing untold cases of TVI, and they care less simply blaming it on licensed

amateur operations. (They have the bigger and more impressive antenna systems.)

I shall proudly display my call sign on the rear window of my car using readily available neat decals. They show up better and cost considerably less. So let the CBers fill the State coffers.

Larry Garland, W4LIN
Inverness, Florida

Dear Mr. Editor:

I will no longer be able to write the DX Article for Skip. Due to time, finances and

many other factors I am giving up amateur radio as a hobby and selling my rig. Maybe after I finish college I will go back to amateur radio.

I did enjoy writing the article and I hope you will be able to find someone else to continue it.

Thank you for all your help.

Yours respectively and 73s,
Phil Reid, WB4ONC
St. Petersburg

(Editor's Note: Thanks Phil for being our DX editor. Now we are looking for a replacement. Any takers? We can't print it if we don't get it.)

CHIP VERES, WB4OQN, thought the Florida QSO Party was fun. Chip lives in Miami. "It feels great to be chased instead of chasing ... thanks to all my out of state stations that caught me..." (See scores elsewhere.)

ROBOT

For \$495 you can operate a two-way Robot SSTV station.

ROBOT MODEL 70 MONITOR	\$495.
ROBOT MODEL 80 CAMERA	465.

Phone: (305) 233-3631

Nights-Weekends (305) 666-1347

• EXPORT ORDERS OUR SPECIALTY •

Now with the purchase of a Robot SSTV monitor only, Robot will make you a free personalized SSTV tape that will enable you to transmit a video SSTV signal without having to own an SSTV camera. After you have purchased your Robot monitor, just mail us the call sign card, photos, drawings, etc., that you want on your tape, and we will make up a five-minute tape for you (reel or cartridge) and send it to you by return mail. You then simply play the tape on an audio tape recorder that is plugged into the mic jack of your transmitter or transceiver, and you are transmitting an SSTV video signal.

Now, for just \$495 (the cost of the Robot SSTV Monitor alone) you can join the many amateurs who have already made great progress towards their WAC, and WAS certificates and working their first 100 countries on two-way SSTV

HAMBAR
